**"2-day online symposium on- Perpetual Cities: Past, Present and Future" on 17th
& 18th March 2023**

**Department of Architecture and Planning, Birla Institute of
Technology, Mesra, Ranchi**

The [Department of Architecture and Planning, BIT , Mesra](#) successfully conducted the 2- day online Symposium on "Perpetual Cities: Past , Present and Future."on 17th and 18th March , 2023.

Cities across the globe continue to evolve and grow with the human population and demonstrate complex interplay of various socio-cultural dynamics. The cities exhibit our glorious past and continue transforming as per the present and future demands. As the cities grow, the issues become more complex, and multiple approaches must be adopted to address them. The concept of sustainable cities is the call for the present-day situation. Sustainable cities are resilient and can adapt to, mitigate, and promote economic, social, and environmental change. Various tools like urban regeneration, renewal, urban conservation, and redevelopment have proven effective ways to create a sustainable built environment. These approaches address the socio-cultural, economic, and environmental needs of the cities and their people.

This online symposium on- "Perpetual Cities: Past, Present and Future" created a platform for discussion and debate among students, academicians, and urban practitioners on the current issues of cities and the way forward. The experts in the field of planning, design, regeneration, and conservation and their valuable insights on urban issues and the various approaches to resolve them helped students, young city planners, architects, urban designers, urban regeneration professionals, and academicians to develop an understanding of cities and its need.

Program Schedule

TIMING	DETAILS	SESSION CONTENT/ TOPIC	SPEAKER
DAY 01 (SESSION 01: 10:30 AM to 1:00 PM)			
10:30 AM to 11:00 AM	INTRODUCTION

LET'S UNDERSTAND OUR SHIPS A LITTLE BETTER

IT ASKS THE QUESTION: IF YOU REPLACE EVERY PART OF A SHIP ONE BY ONE UNTIL NONE OF THE ORIGINAL PARTS REMAIN...

WILL IT BE THE SAME SHIP?

AND IF NOT, AT WHAT POINT DOES IT BECOME ANOTHER SHIP?

Mega Cities: some approaches for the resilient futures

Operational framework and deliverables

CONCLUSION

From Vulnerability -to- Resilience

The core concern
Livable land-use planning & efficient-humane infrastructure
Design, operation & management: *Inter-relationships*

The long-term vision
Collaboration & Convergence:
Embedding an e-repository of Urban and Regional informatics

Themes
Harmonious integration of mega regions & urban centers

- Inclusive urban and regional Governance
- Decision support & Control systems
- Formulation of national and regional decentralized frameworks & standards
- Network planning
- Legal frameworks
- Disaster management

Pilot projects
