

Success Story

Arpita Kumari

MCA:2006-2009

There is a very thin line between success and failure. For me , success is always doing my best in life and achieving the desired goal.

When I look back as a student, for me success was the achievement of a desired goal, like getting admission to a good college, a good job.

In this line, when I was preparing for my MCA, I got selected in number of colleges. It was a tough decision to make, as no one had done MCA from my family members earlier.

From all those institutes, I selected BIT, as it is big brand name everywhere. Most important thing, my parents supported me blindly and I am happy with no regrets at all.

I joined BIT Noida campus which added an edge to my personality that helped in my carrier growth. My professors supported me so well that by the end of the course, I had been selected in one of the top company named "TCS".

Now, after almost 10 years of passing out, I'm working as a "Senior Consultant" in "CAPGEMINI" .

As a BIT alumni, I am just thankful to my professors and peers who are still in contact with me that is the best part of being an BITan.

Thanks
