

Birla Institute of technology, what can I say about this institution. But one thing that I can surely reveal with proud is that getting admission here was one of the finest decisions I had taken in my life. I came here to pursue a bachelor's degree in Animation and multimedia but got to know about what I really wanted from life after beginning the journey.

In less than a year's time I was given the tag of a "dancer" and the best part of this was my faculty's involvement in enhancing and promoting my talent. Each and every faculty member looked up to me whenever I was on stage and that was pretty enough to get the motivation to go all out. 2014 was the year when I completed my graduation and had perfect vision of moving ahead. Three years down the line, I am a sports journalist working with Indian Express's website.

Though, I'm still left with a lot things which are lined up as far as my career is concerned but I can surely say one thing that the kind of confidence and vision I have about my life and career is because I was a part of this institution and was under the guidance of some highly talented yet sweet professors who always motivated me with every step I took. Just want to thank BIT for making me who I am presently !!!
